The Association of Environmental & Engineering Geologists

Connecting Professionals, Practice and the Public

The Association of Environmental & Engineering Geologists (AEG) is pleased to announce the Summer, 2013 series of review courses for the ASBOG@geology licensing exam taught by REG REVIEW, Inc. AEG and REG REVIEW, Inc. have partnered to provide these courses since 1992. In the Summer of 2013, nine one-day review courses for the ASBOG@licensing exam will be offered regionally throughout the U.S. These nine courses will be spread out into the following regions, the West Coast including a course in both Northern and Southern California (the CA courses are now presented in 2 sections - 1 day for the ASBOG@and part of a day for the CA Supplemental), the East Coast, the Central U.S. Region. Specific locations are listed below.

REG REVIEW's approach is to give you the focus and direction needed to appropriately study for the exams. The emphasis of the topics in the course is based on the emphasis on the exams. We cover the approach of the exam and highlight the types of information you would need for exam level questions. For specific information on our course content and study materials please visit our website at regreview.com.

REG REVIEW, Inc students typically have a pass rate that is 20% to 25% higher than the National average. Our success rate has ranged from 85% to 99% on both exams since we began teaching to the ASBOG@exam in 2000. The National pass rate during the same time was 55% to 63% for the FG and 61% to 80% for the PG. With the current state of the economy, can you afford to not pass the exam the first time you take it?

Who should take this class? Anyone who feels they need help getting the focus and direction needed to be able to streamline their studying process to adequately address the topics covered by the exam.

Course dates and locations are as follows:
(For more specific location information please go to our website at:

<http://regreview.com/2013summercourselocations.html>
