

2013 AEG Inland Empire Annual Field Trip

May 11, 2013

Approximately 7:00 am to 1:00 pm. Location: I-15 Corridor; Temecula to Corona
Cost: Free, but your time and talent will be taken advantage of.

Title: Wildomar Fault, Elsinore Graben and Development Challenges, and Vulcan Quarry (Corona)

Field Trip will begin at Lake Elsinore where we will congregate at Farmer Boys in the Home Depot Center (north corner of Collier Avenue and Central). There we will carpool to Temecula where Ernie Roumelis will make a presentation on the Willard fault (trench study). Then back to Lake Elsinore where Kerry Cato will discuss the Elsinore Graben and a proposed hydroelectric power project and what the many issues were regarding project development. Last, we will carpool to the Vulcan aggregate quarry in Corona for a guided tour of this state of the art open pit quarry.

Trip is intended to be informal with the objective to highlight some of the less obvious geologic features and hazards that are along the I-15 corridor between Temecula and Corona.

Attendance will be limited to approximately five cars (approximately 20 people) for highway safety purposes. We will meet at Lake Elsinore at 7:00 am, have a brief introduction, and then form a carpool to limit the number of vehicles.

To sign up, please contact Mark Spykerman at mspykerman@earthsys.com. Deadline to RSVP is May 8th. **RSVP IS REQUIRED TO OBTAIN A GUIDE BOOK.**
